1. HIGHLIGHTS OF FINDINGS

This report presents information on the clients and agencies in the state of Arizona. The information is drawn from a national study, Hunger in America 2006, conducted for America's Second Harvest (A2H), the nation's largest organization of emergency food providers. The national study is based on completed in-person interviews with more than 52,000 clients served by the A2H food bank network, as well as on completed questionnaires from more than 30,000 A2H agencies. The study summarized below focuses mainly on emergency food providers and their clients who are supplied with food by food banks in the A2H network. Here, emergency food providers are defined to include food pantries, soup kitchens, and emergency shelters serving short-term residents. It should be recognized that many other types of provider organizations served by food banks are, for the most part, *not* described in this study. These providers who are not covered included such services as Congregate Meals for seniors, day care facilities, and after school programs.

Key findings are summarized below:

- The A2H system in Arizona provides emergency food for an estimated 479,300 different people annually.
- Approximately 77,500 different people receive emergency food assistance in any given week.

- 31% of the members of households in Arizona are children under 18 years old (Table 5.3.2).
- 9% of the members of households are children age 0 to 5 years (Table 5.3.2).
- 10% of the members of households are elderly (Table 5.3.2).

- 30% are homeless (Table 5.9.1.1).

MANY A2H CLIENTS ARE FOOD INSECURE OR ARE EXPERIENCING HUNGER

- Among all client households served by emergency food programs in Arizona, 71% are food insecure, according to the U.S. government's official food security scale. This includes client households who are food insecure without hunger and those who are food insecure with hunger (Table 6.1.1).
- 38% of the clients are experiencing hunger (Table 6.1.1).
- Among households with children, 73% are food insecure and 34% are experiencing hunger (Table 6.1.1).
